

Dear FCC;

My family has enjoyed the public protection afforded by Wisconsin's No Call List and are asking that its enforcement provisions remain strong. As public and private citizens we want to control; the public access to our private lives, so we limit who has access to our telephone numbers; both land lines and cell phones. This message is intended to convey to you that we are pleased with Wisconsin's No Call List protection and hope that you can retain it and make it a standard to be replicated where ever it is possible.

Thank you for protecting individual rights while maintaining access to the our society's vital communications tools.

Ron Konkol
